EB Inventory Management Product Vision

The Elektrobit Inventory Management helps to organize and locate hardware devices.

This will support the R&D department to control all of the used devices. User can easily update the current location and owner of a device and can check where the hardware is and who it holds. This is important for example to locate bottlenecks soon enough.

Release Plan

Release	1.1					
No Sprints	6					
Due Date	17.07.2013	(final release)				
Sprint #	Theme	User Stories	Est. Effort	Burn-Down	Real Effort	
6						
7						
8						
9						
10						
11						
12						
Total			0		0	
Release	1.0					
No Sprints	6					
Due Date	29.05.2013	(mid-term release)				
Sprint #	Theme	User Stories	Est. Effort	Burn-Down	Real Effort	
0				24		
1	Project Start	1, 2, 3, 4, 5, 6, 7	24			
2						
3						
4						
5						
6						
Total			24		0	

Product Backlog

#	Effort	Category	Short Name	Item Description	Acceptance Criteria
10	3	Dev Environment	Test Preparation	Defining how and when which test cases should be written	Document have to be written.
11	5	Basic Dev	Website Framework		
12	5	Basic Dev	Database Framework		
13	2	Basic Dev	Connecting Website and DB		
14	5	Basic Dev	Android App Framework		
15	4	Basic Dev	Connecting App and DB		
16	4	User MGMT	Register		
17	5	User MGMT	Login		
18	2	User MGMT	Logout		
19	4	User MGMT	Reset Password		
20	3	User MGMT	Basic Profile		
21	4	User MGMT	Change Password		
...	

Sprint Backlog

#	Rel.	Effort	Category	Short Name	Item Description	Acceptance Criteria
1	1	5	Specialist concept	Requirements definition	Get a homogenous understanding of the needs the stakeholder wants.	Written down in a document and every stakeholder should "sign it".
2	2	2	Communication	Definition of Communication	Selection of communication platform/devices/software and how it will be used.	Written down in a document.
3	3	1	Quality MGMT	Definition of Done	Definition of quality criterias for when a developed feature is done.	Written down in a document.
4	3	1	Quality MGMT	Definition of Readiness	Definition of when a user story is ready	Written down in a document.
5	4	2	Dev Environment	Gathering Server/DB Information	Gathering all kind of information about the different types of databases, server and in particular login data and location.	Information should be there.
6	5	2	Configuration MGMT	Code folder plan	How all of the written code will be stored in the SCM (source code management) system	Written down in a document.
7	5	2	Configuration MGMT	Data folder plan	How all of the data and documents will be stored in the files section of the repository.	Written down in a document.
8	4	1	Dev Environment	Technology definition	Which programming languages, operating systems etc. will be used.	All of the OS and languages should be defined.
9	4	8	Dev Environment	Introduction Workshop	Introduction workshop concerning Sourceforge (and plugins), installing all the software, SCM-Plugins, etc. to get a homogenous work environment and vision.	All of the developer should have installed all of the software and all of the required knowledge to use it.
