This document provides all features, which were not done during our project because our customer decided that other features were more important.

This overview gives our customer additional information about the feature in order to give them the possibility to do it after the project:

#	Effort	Category	Short Name	Item Description	Acceptance Criteria
84	8	HW MGMT	Sub list on add entry view	As an user, I can see a sub list of the main list on the add entry view in order to find the part number faster.	There is a sub list of the meta data which can be filtered via a search field.
85	5	User MGMT	Login	As an admin, I can login to the admin views in order to limit admin functionalities for other users.	The admin can login to the admin views. Needed login information is username and PW.
86	3	User MGMT	Logout	As an admin, I can logout to leave the application in order to avoid data abuse or changes of non-admins.	Only one click is needed to log out the admin from the website. The button will not be displayed when not logged in.
87	3	Design Refresh	Design Idea Collection	As a developer, I create some mockups with potential designs and think about a name for the app which fits to our customers image and design in order to provide an end product to our customer that is consistent with their imagination. These mockups and ideas for names will be discussed with our customer in the next meeting.	Some mockups and names for the app are created which can be discussed with our customer in the next meeting.
88	3	Design Refresh	Refresh design of the desktop version	As a developer, I refresh the desing of desktop version like it was decided with our customer (change colors,	The design of the desktop is refreshed and meets the expectations of our customer.

				font size, font), in order to have a better user experience.	
89	3	Design Refresh	Refresh design of app	As a developer, I refresh the desing of the app like it was decided with our customer (change colors, font size, font), in order to have a better user experience.	The design of the app is refreshed and meets the expectations of our customer.
90	8	Profession al Search	Combine search criteria	As an user, I can combine search criteria (e.g. model and office) to restrict the outcome of the search and to improve the usability.	At least two search criterias can be combined.
91	8	HW MGMT	Basic Sorting (Desktop)	As an user, I can sort the HW in order to find groups of data quickly.	Every column can be used as a sorting criteria. If the user clicks on a column it will be automatically sorted alphabetically.
92	3	Native App	Select All	As an user, I can select all results of the scan at once, in order to save time.	A button "select all" is added which selects all entries in the list of scan results.
